There are, of course, many definitions of "thesis." These are taken from the *Oxford English Dictionary* —

II. In Logic, Rhetoric, etc.
4.
a. A proposition laid down or stated, esp. as a theme to be discussed and proved, or to be maintained against attack; a statement, assertion, tenet.
c. A theme for a school exercise, composition, or essay.

Etymology: < Greek *thesis* putting, placing; a proposition, affirmation, etc., < root *the-* of *ti-thé-nai* to put, place.
